SUMMARY

Frontend developer with a background in computer science and cybersecurity, experienced in building iOS interfaces with SwiftUI and MVVM, designing role-based user flows, and turning requirements into clean, reusable UI components.

EDUCATION

EAST STROUDSBURG UNIVERSITY
EAST STROUDSBURG, PA
Dean’s List
B.S. COMPUTER SCIENCE | B.S CYBER SECURITY
Graduated May 2026

COURSEWORK

Data Structures and Algorithms
Software Engineering
Programming Languages
Database Design
Operating Systems
Networks and Data Communications
Computer Organization & Architecture
Intro to Programming II
Ethics in Computer Science

SKILLS

Languages: Swift, JavaScript, HTML, CSS, C#, Python, SQL, C++
Frontend: SwiftUI, React, .NET MAUI, MVVM, Responsive UI, UI/UX Flow Design
Data & APIs: Firebase / Firestore, REST APIs, SQLite
Tools: Xcode, Git, Visual Studio, VS Code, macOS, PlantUML / UML

EXPERIENCE

Neofortunity Internship – Frontend Developer Intern
January 2026 – August 2026 | Remote

- Built the frontend of a volunteer-opportunity board iOS app in Swift and SwiftUI using Xcode over an 8-month internship
- Created all views and models following MVVM architecture, composing small components into larger reusable ones
- Designed the app’s navigation flow, including separate flows for each user role
- Collaborated with the backend developer to connect UI components to Firebase/Firestore CRUD functions
- Took on UI design responsibilities for the team and resolved cross-version issues between developer projects

Direct Service-Learning Level 2 – Frontend
Cherry Valley National Wildlife Refuge | Fall 2024

- Developed a conceptual events page for posting new events on a calendar
- Built a landing page in HTML and CSS to guide visitors through a smooth experience

Army National Guard – Aviation Operations Specialist (15P)
2019 – 2023

- Managed operational systems and ensured safety in high pressure environments

PROJECTS

Full-Stack E-Commerce Platform (Frontend Lead)

- Implemented the initial UI for buyer, seller and admin roles, with role-based navigation and access control
- Built login, registration, cart, checkout and seller dashboard screens
- Translated UML use cases and sequence diagrams into visible UI flows

Personal Portfolio Website

- Designed and built a multi-page portfolio site with HTML, CSS and JavaScript, version-controlled on GitHub
